

Carol Soderlund

Color Mixing For Dyers 4: Student Supply List

Length: 5 days

Level: All levels. Previous experience with Procion MX dyes a plus, but not required

Materials Fee: \$95

Carol will provide all the dyes and chemicals necessary, as well as over 100 pages of handouts and swatch book pages, and all the fabric necessary for the sample book. Carol will bring a variety of other equipment to use in class.

Fabric	
5 yards fabric for further dye explorations	PFD--prepared for dyeing-- fabric recommended. In addition to cotton, you may bring some silk, rayon, linen or tencel if you like to work in these fibers.. Note to weavers: It is fine if you would like to bring some skeined yarns for dyeing: cotton, linen, rayon, tencel, or silk.
Optional: samples of your dyed fabric and/or photos of your work	
Office Supplies	Please label your supplies
notebook for note taking and a pen	
two three-ring binders	one 1 1/2" thick, and one 1/2" thick
100 CLEAR page protectors	Buy in bulk at office supply store: do not buy those that have holes through the main section of the page protector. You want the ones with holes through the a band on the margin.
Scotch Double Sided Tape 1/2" wide	enough to total 100 yards of tape
masking tape	
30 long (#10) envelopes	
stapler plus extra staples	
20 rubber bands	
Sharpie (permanent marker)	
calculator	

Cutting Tools	
small pair scissors for paper and one for fabric	
rotary cutter	• Rotary cutter (bring a fresh straight blade as you will cut through numerous layers at once. The large 60 mm cutters work the best for this. Students tell me that if you bring a 45 mm cutter you will struggle, as the depth of fabric is deeper than the exposed blade.)
rotary cutting mat	11" x 17" or larger if you can manage it
Quilter's plexiglas rulers	6" x 24" and 6" x 12"

Other items	
Iron and ironing pad, or old terry towel	if you are driving
adhesive lint roller	from the dollar store
rubber gloves	both the loose dishwashing kind that extend up the arm, and the close-fitting latex or nitrile kind
3 pointy top squeeze bottles, 8 oz. each	
two 5 gallon buckets	if you are driving
one large strong plastic spoon	at least 12" long --straight, not bent, is better
one box one gallon ziploc bags	
dye mask, if you have one	
apron or old clothes	

Plastic Containers	If you are flying, we will arrange to get these items for you as needed.
one plastic orange juice bottle	Simply Orange brand (or limeade, etc) at least 1.5L
one gallon milk jug	Rinse all jugs, and be sure to keep the caps!
